

DELETE™

Silicone Based Antifoam

DESCRIPTION:

DELETE™ is a silicone antifoam which eliminates foam in recovery tanks of extraction carpet machines, automatic floor scrubbers and other industrial recovery systems. **DELETE™** is non-corrosive and will not harm equipment. **DELETE™** quickly eliminates foam which can greatly inhibit efficient recovery and continuous equipment use. Carpets that have been previously cleaned with high foaming carpet shampoo may cause excessive foam when cleaned by the extraction method. **DELETE™** in the recovery tank solves this problem. **DELETE™** has many practical uses and industrial applications and should be used wherever excessive foaming creates a problem.

DIRECTIONS FOR USE:

Before using, read Material Safety Data Sheet for this material.

1. Shake well before using.
2. Add approximately 1 ounce of **DELETE™** for each 5 gallons of recovery tank or sink capacity.
3. When cleaning carpet that has been previously cleaned with high foam shampoo, vacuum diluted **DELETE™** into recovery hose and spray onto side of the recovery tank prior to extraction cleaning.
